Precision Ceramics USA offers in depth expertise in the engineering of technical ceramics. We focus on quality solutions, from procurement and supply to technical design and specialist machining – total ceramics solutions for demanding situations.

Our reputation for quality and service has traveled world-wide, and our applications are found in medical equipment, aerospace technology, electronic instruments, power generation, and the offshore oil and gas industry.

We can work with you through prototype development to full-scale component production. Our engineers have years of expertise in developing solutions to demanding situations of temperature, pressure, machine tolerances, and a variety of harsh environmental situations.

Our comprehensive range of technical ceramics includes:

- Macor® machinable glass ceramic
- Shapal™ machinable aluminum nitride
- Boron nitride
- Alumina
- Zirconia
- Aluminum Nitride
- Silicon Nitride
- Silicon Carbide
- Fish Spine Beads
- Specialty glasses - quartz, sapphire, steatite and other specialist materials
